

Aquarium plants Catalogue 2023-2024.

Best Plants for your aquarium

Beautiful aquarium plants of top quality!

Our plants are grown in our 20000 m² greenhouse complex. Our greenhouses are equipped with state-of-the-art horticultural technology so that we can maintain an optimally controlled climate. With more than 200 plant varieties, individual treatment and care are an absolute must. This allows us to supply our plant varieties all year round.

East Asia

ACORUS PUSILES (DWARF)

Acorus is a Terrarium plant which can also be placed in a Paludarium or Aquarium. The beautiful short, green leaves with a maximum height of 10 cm mean this plant is perfectly suited as a foreground plant. Please ensure that the root stock remains above your substrate. As this is a live decorative plant in an aquarium the expected life span is a few months.

ALTERNANTHERA CARDINALIS VARIEGATA

This variety is the most intense red coloured Althernanthera and adds real interest in a tank with it's yellow veined leaves. This variety can be easily planted in groups or as a solitary statement plant. Due to the slow growth rate it is also suitable for smaller fish tanks. Cardinalis Variegata requires a good supply of Iron and lenty of light in order to retai its rich colour.

8 715897 306822

18-30°C 30 cm

West Africa

ANUBIAS BARTERI

Barteri is the biggest Anubias in our range, and needs plenty of space. Like all other Anubias varieties the light demands for this plant are relatively low. Because Anubias have leather like leaves and can resist high temperatures, they are perfect for Discus and Cichlid aquariums. Please make sure that the root stock is always planted above your substrate.

5 cm pot

P2020105

8 715897 015632

West Africa

ANUBIAS BARTERI VAR. NANA

Hardy, medium height, slow-growing plant with a beautiful deep green colour. The rootstock must be kept above the substrate, and does well rooted onto wood, ornaments and also 3D backgrounds. Suitable for warmer tanks, and also dutch style aquariums where the leaves are not submerged.

5 cm pot

West Africa

ANUBIAS COFFEEFOLIA

This slow growing Anubias is very popular because of the beautiful crimped, oval shaped leaves. Young leaves are cognac coloured and change to green as they grow. Due to the slow growth rate, and ease of keeping, it is perfectly suited for smaller aquaria.

5 cm pot

P2020117

8 715897 031519

Cameroon

ANUBIAS CONGENSIS

A hardy, medium sized plant with leather like dark green leaves. Anubias species need little light and fertilizer and can be used in aquariums with high water temperatures. For a healthy growth rate, the rhizome must be planted above the gravel.

5 cm pot

P2020130

8 715897 015694

West Africa

ANUBIAS HASTIFOLIA

The Hastifolia is different to the other Anubias because of its triangle shaped leaves. As these leaves curl, they can create a lovely effect. This variety is a slow grower but can grow to a fair size, so is better suited to bigger aquaria.

5 cm pot

P2020140

8 715897 015717

West Africa

ANUBIAS HETEROPHYLLA

With it's light green, slightly curling leaves and relatively quick growth rate, this Anubias is different to the other varieties. It can tolerate much more light than some Anubias, and is suitable for bigger aquaria and paludaria due to its larger size.

5 cm pot

8 715897 015830

<<
INDEX

Madagascar

**APON. MADAGASCARIENSIS
BULB+LEAF**

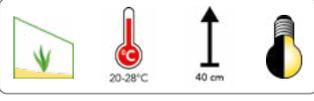

This aponogeton has lattice-like skeletal leaves, the largest in the Aponogeton family. This variety stays a grassy green colour, and will grow pretty quickly once settled, although this can take a while. Like most other Aponogetons this variety needs a rest period, comparable to Dutch Tulips. Just give it time and you'll be rewarded with a beautiful specimen plant.

Bulb + Leaf

P2020205

8 715897 015847

Madagascar

**APONOGETON ULVACEUS
BULB+LEAF**

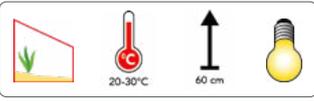

Due to the low demands of this plant, it is one of the most popular Aponogetons. Its' leaves are bright green, transparent and beautifully curved. With an eventual height of 60 cm, and very fast growing leaves, even without bright light, it is a plant suitable for bigger aquaria.

NOMAPHILA SIAMENSIS PARVIFOLIA

A very compact variety of the ordinary Nomaphila. The plant has leaves that grow similar to lettuce. With sufficient light, the colour is dark green to red. The compact growth of the plant is suited to smaller aquariums and nano aquariums. As the lowest growing leaves will die and become loose it can make the plant look ugly, therefore it is advisable to hide this plant's lower section, behind others.

Which plant for which Aquarium?

Which plants are suitable for your aquarium depends on the PAR value of the lighting. PAR stands for Photosynthetically Active Radiation, i.e. the light rays responsible for photosynthesis, the growth of plants. The higher the PAR, the better plants will grow.

Dark
60-100 PAR

Easy
★

Half Light

>180 PAR

Advanced
★★★

PAR value.
($\mu\text{mol}/\text{m}^2/\text{s}$).

PAR value ($\mu\text{mol}/\text{m}^2/\text{s}$)

Easy ★ Average ★★ Advanced ★★★

Our labels denote how much light is required for each plant species. See the information on this graphic.

Tip!

Does your aquarium not have enough PAR?

Replace the bulb with a Superfish Retro Led Bright Lamp, Slim LED or Scaper LED !

These options ensure optimal plant growth !

◀ INDEX

Instructions for use:

1

Preparation:
Carefully remove the plant from the cup and wash the jelly off using clean tap water.

2

Trim the plant to size:
Cut the plant into approx 6 to 8 parts using sharp scissors.

3

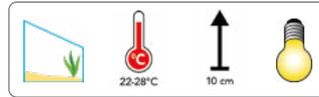

Plant the plant:
Plant these into your substrate using tweezers and watch them develop within your AquaScope.

EASY GROW 1 ALTERNANTHERA REINECKII MINI

The only true red foreground plant, this is a new variety of the Reineckii. This variety grows slowly and stays compact, making an ideal foreground plant and perfect for small aquariums. Requires plenty of light, and a proper iron rich fertiliser.
