Drip tests

Professional drip test for precise determination of pH - acidity in ponds.

Test range pH 6 - 9

The handy visualised instructions for use, included test tubes and colour chart make testing easy.

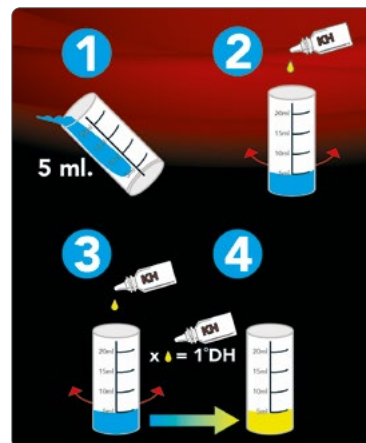

Contents sufficient for 40x pH testing.

COLOMBO PH TEST.

S.R.P.

€9,99

Art. no.: 05020285

Professional drip test for precise determination of KH - carbohydrate hardness in ponds.

Precise test results due to clear colour change at different values

The handy visualised instructions and included test tubes make testing easy.

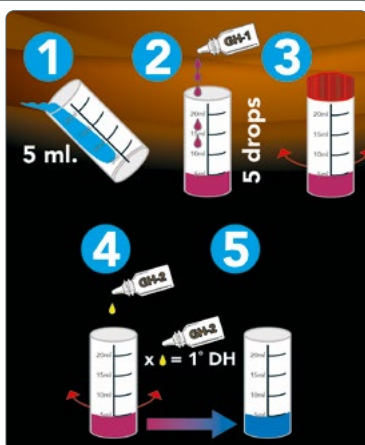

Contents sufficient for an average of 40x KH testing.

COLOMBO KH TEST.

S.R.P.

€9,99

Art. no.: 05020297

Professional drip test for precise determination of GH - total hardness in ponds.

Precise test results due to clear colour change at different values

The handy visualised instructions and included test tubes make testing easy.

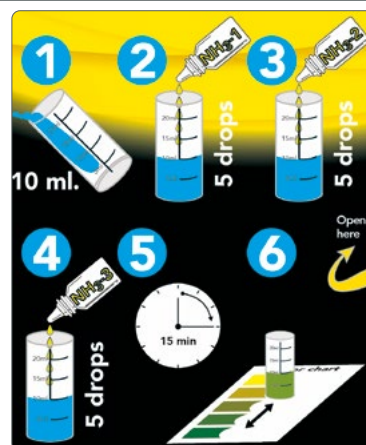

Contents sufficient for an average of 40x GH testing.

COLOMBO GH TEST.

S.R.P.

€9,99

Art. no.: 05020296

Professional drip test for precise determination of NH₃ - ammonia value in ponds.

Sensitive test also for measuring low values

The handy visualised instructions, included test tubes and colour chart make testing easy.

Contents sufficient for 40x Ammonia level testing.

COLOMBO NH3 TEST.

S.R.P.

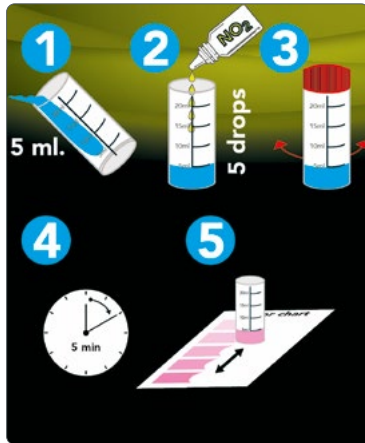

€15,29

Art. no.: 05020291

Clean water is the base ingredient for a healthy, clear pond.

Complete range of drip tests for freshwater aquariums. Tests available for pH, KH, GH, Ammonia, Nitrite, Nitrate, Phosphate. The tests are easy to use and provide a reliable measurement result. You can enter the water values on our test form. You can also use the online pond check: www.colombo.nl

Professional drip test for precise determination of NO_2 - nitrite value in ponds.

Sensitive test also for measuring low values

The handy visualised instructions for use, included test tubes and colour chart make testing easy.

Contents sufficient for 40x Nitrite level testing.

COLOMBO NO2 TEST.

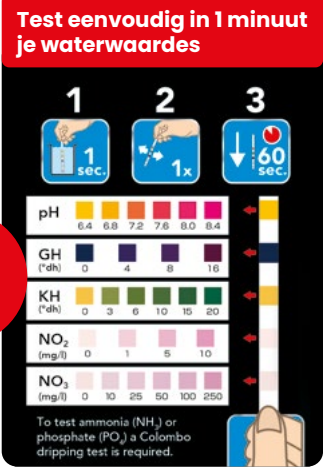

S.R.P.

€9,99

Art. no.: 05020287

1 pack contains
50
test strips

Quicktest test strips for freshwater, contains 50 test strips with which you can quickly and conveniently measure the 6 most important values of pond water. Test the following values, pH - acidity, KH carbonate hardness, GH - total hardness, NO_2 - nitrite, NO_3 - nitrate and CL - chlorine

You can test 50 x 6 values, a total of 300 test values! After opening the packaging, store in a dry place. Limited shelf life in closed packaging.

Suitable for aquarium and pond.

COLOMBO 6 IN 1 QUICKTEST POND.

S.R.P.

€16,99

Art. no.: 05020295

Quicktest Display:

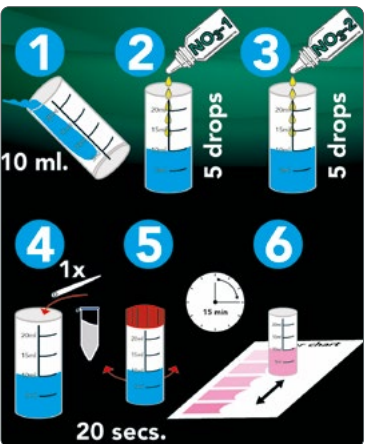

- Attractive display.
- Display contains 25 packs.
- Professional test for the 6 most important parameters.

COLOMBO QUICKTEST 25 X DISPLAY.

S.R.P.

€424,75

Art. no.: 05020492

Professional drip test for precise determination of NO_3 - nitrate value in ponds.

Test range from 0.0 - 100 mg/l

The handy visualised instructions, included test tubes and colour chart make testing easy.

Contents sufficient for 40x Nitrate level tests.

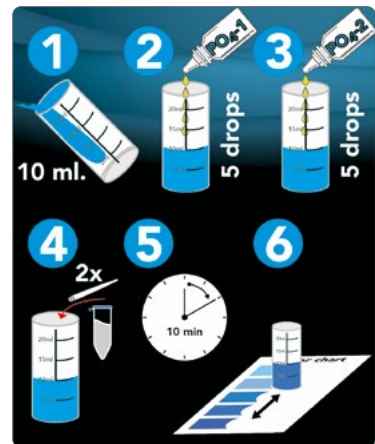

COLOMBO NO3 TEST.

S.R.P.

€15,29

Art. no.: 05020289

Professional drip test for precise determination of PO_4 - phosphate content in ponds.

Test range from 0.0 - 5 mg/l

The handy visualised instructions, included test tubes and colour chart make testing easy.

Contents sufficient for 40x phosphate level testing.

COLOMBO PO4 TEST.

S.R.P.

€15,29

Art. no.: 05020298

Aquatest Testlab Professional.

« INDEX

Inclusief.

Acidity

Carbonate Hardness

General Hardness

Ammonia

Nitrite

Nitrate

Phosphate

The very affordable Aquatest Testlab Professional contains all the drip tests in a practical case. On our website we have videos to show you how to do the watertest. This way water testing becomes very simple! Visit our website www.colombo.nl and try it!

Unique advantages:

- Accurate tests
- Easy to use
- Equipped with colour charts with exact colours
- Complete with comprehensive manual.

Aquatest Testlab Professional

Complete test kit to measure the 7 important pond water values. Contains professional drip tests for pH, GH, KH, NO₂, NO₃, NH₃ & PO₄. All supplies are in a handy plastic case.

The included test tubes and complete instructions for use make water testing very easy. In the case, you store all tests together.

If one of the tests in the case runs out, you can use loose Colombo aqua tests as replacements.

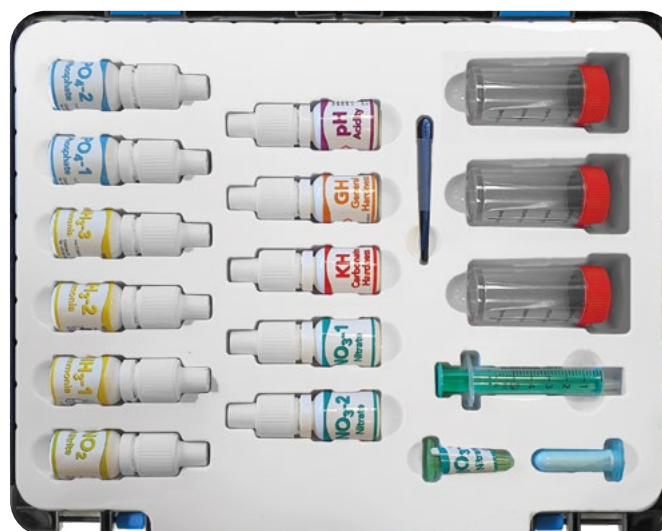

With the Colombo Aqua testlab, you can test the 7 important water values 40 times, a total of 280 water tests!

COLOMBO AQUATEST TESTLAB PRO.

S.R.P.

€52,49

Art. no.: 05020292

Correcting watervalue.

pH min

An excessively high pH level can be safely reduced with Colombo pH-min, the product leaves no harmful residues in the pond water.

The ideal pH value is between 7 and 8, test the pH value regularly correct if there are deviating values.

Lower the pH gradually, by up to 1 unit per day. For safe use, the KH should not be lower than 6°DH.

Contents 1 litre, lowers pH by about 2 units in 5,000 litres of pond water.

Capacity 2.5 litres, lowers pH by about 2 units in 12,500 litres of pond water.

COLOMBO PH- 1.000ML.

S.R.P.

€23,99

Art. no.: 05020189

8 715897 262807

GH plus

Correct total hardness (GH) is a prerequisite for a healthy pond with clear water. GH is a measure of the total amount of dissolved minerals in your pond, which consist mainly of calcium.

Plants and fish need these minerals for healthy growth.

An optimum GH value is between 10 and 15°DH. Test the GH value regularly with a Colombo test kit and add GH+ if necessary to keep the value at the desired level.

The ratios below increase the GH value by 4°DH.

COLOMBO GH+ 1000ML/7.000L.

S.R.P.

€14,99

Art. no.: 05020125

8 715897 018985

S.R.P.

€74,99

Art. no.: 05020135

8 714635 000510

KH plus

Correct carbonate hardness (KH) is a prerequisite for a healthy pond with clear water, healthy plants and fish and stable acidity (pH). KH is a measure of the total amount of dissolved carbonates in your pond.

If the KH is too low, the pH can fluctuate rapidly, which is very harmful to pond life.

An optimum KH value is between 6 and 10°DH. Test the KH value regularly with a Colombo test kit and add KH+ if necessary to keep the value at the desired level.

The ratios below increase the KH value by 4°DH.

COLOMBO KH+ 1000ML/7.000L.

S.R.P.

€16,99

Filter start-up & maintenance.

Bactur Filterstart

Bactur filterstart is essential when starting up your filter. Both for new filters and for filters that have been cleaned or put back into operation after winter. The bacteria ensure the optimal function of a biological pond filter and thus a healthy pond and fish.

Bactur Filter Start contains over 800 million live nitrifying bacteria per millilitre.

Dosage: At start-up: 40 ml per 1,000 litres of water per day for 5 days. At water temperatures below 10°C, double the dosage. Maintenance dosage: 20 ml per 1,000 litres of water per week.

COLOMBO BACTURE FILTER START 500ML.

S.R.P.

€18,49

Art. no.: 05020231

8 715897 189777

Contents 500 ml sufficient for 2,500 litres of pond water.

COLOMBO BACTURE FILTER START 1000ML.

S.R.P.

€26,99

Art. no.: 05020233

8 715897 025969

Contents 1,000 ml sufficient for 5,000 litres of pond water.

COLOMBO BACTURE FILTER START 2500ML.

S.R.P.

€47,49

Art. no.: 05020236

8 715897 025976

Contents 2,500 ml sufficient for 12,500 litres of pond water.

Bactur Clean

Bactur Clean is the ideal product for cleaning and maintaining your pond and filter. The bacteria effectively remove silt at the bottom of the pond and in the filter, in addition to maintaining the bio-film in the pond filter.

Each millilitre contains over 100 million live bacteria.

Directions for use: For start-up (sludge clean-up): 40 ml per 1,000 litres of water per day for 5 days. At water temperatures below 10°C, double the dosage. Maintenance dosage (prevent sludge formation): 20 ml per 1,000 litres of water per week.

COLOMBO BACTURE CLEAN 500ML.

S.R.P.

€15,99

Art. no.: 05020240

8 715897 189784

Contents 500 ml sufficient for 2,500 litres of pond water.

COLOMBO BACTURE CLEAN 1000ML.

S.R.P.

€25,99

Art. no.: 05020242

8 715897 025990

Contents 1,000 ml sufficient for 5,000 litres of pond water.

COLOMBO BACTURE CLEAN 2500ML.

S.R.P.

€44,99

Art. no.: 05020245

8 715897 026003

Contents 2,500 ml sufficient for 12,500 litres of pond water.

Bactur Activator

Activator is a plant-based biocatalyst. The unique plant extracts turbocharge the purification bacteria in Filterstart and Bactur Clean, ensuring optimal bacterial activity.

Nutrition for optimal bacterial growth...

Use Activator in combination with Colombo Bactur Filterstart & Clean, for optimal bacteria action and clean healthy ponds.

COLOMBO BACTURE ACTIVATOR 500 ML.

S.R.P.

€15,99

Art. no.: 05020284

8 715897 189791

Contents 500 ml sufficient for 2,500 litres of pond water.

COLOMBO BACTURE ACTIVATOR 1000 ML.

S.R.P.

€25,99

Art. no.: 05020282

8 715897 043772

Contents 1,000 ml sufficient for 5,000 litres of pond water.

COLOMBO BACTURE ACTIVATOR 2500 ML.

S.R.P.

€44,99

Art. no.: 05020283

8 715897 043789

Contents 2,500 ml sufficient for 12,500 litres of pond water.

Bactuur Bio Start

Adding Bactuur Bio Start to the water creates billions of beneficial bacteria within 24 hours, which support the biological processes in the pond. Normally in new ponds, in spring and after a major cleaning, it takes months before micro-organisms and bacteria have multiplied sufficiently for a biological balance.

Bactuur Bio Start contains 200 billion freeze-dried bacteria.

Provides natural balance in the pond!

Contents 100 ml sufficient for 5,000 litres of pond water.

COLOMBO BACTUUR BIO START 100ML.

S.R.P.

€12,99

Art. no.: 05020225

8 715897 158728

Bacto Balls

Active balls with bacteria for a healthy pond. Use Bacto Balls for clean and clear water, optimum biology and healthy plants and fish. They also reduce algae growth and break down organic waste.

Bacto balls are impregnated with the unique Colombo bacteria. DNA screening techniques have been used to select the best strains.

For convenient use, Bacto Balls can be put in a media bag that can be hung in the filter.

Contents 500 ml sufficient for 5,000 litres of pond water.

COLOMBO BACTO BALLS 500ML.

S.R.P.

€9,99

Art. no.: 05020273

8 715897 338496

Contents 1000 ml sufficient for 10,000 litres of pond water.

S.R.P.

€29,99

Art. no.: 05020277

8 715897 338519

NEW!

Fresh Bacto

Straight away place some Fish in your pond, aquarium or quarantine tank? Normally you have to wait at least one week before you can put some fish in new tanks, with Colombo Fresh Bacto your biological system starts up in no time, the live nitrifying bacteria go to work immediately and prevent problems with ammonia and nitrite.

1,000 ml is suitable for 1,000 litres of aquarium water, overdosing does no harm, more bacteria means faster action.

Use Colombo Fresh Bacto also after a major cleaning of the pond, quarantine tank, aquarium or the filter, and after treatment with medication, this way you will prevent water problems.

Store in the fridge <6°C, shake well, suitable for freshwater and saltwater

COLOMBO FRESH BACTO 1000 ML.

S.R.P.

€44,99

Art. no.: N3030113

8 715897 341564

NEW!

Prevent & control algae.

Floating (green) algae.

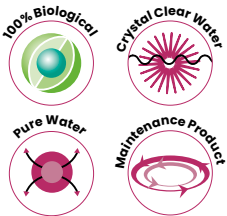

In healthy pond water the development of algae can cause problems. The presence of nutrients and the effect of sunlight can cause a fast growth of algae. Algae can develop as floating algae, which colours the pond green and murky.

In clear water light can enter freely, this is why in ponds with clear water blanket weed is often a problem. The blanket weed grows on the walls of the pond and can overwhelm underwater plants.

Prevent

Bacto-Clear

Bactoclear contains special natural clays and minerals, and a high dose of cleaning bacteria. The clay minerals act as a floating filter material and directly absorb organic pollutants and toxins in the pond. The added natural minerals are essential for fish and plants. The cleaning bacteria clean the pond.

NEW!

<< INDEX

The natural solution for healthy and clear pond water! The 3 components in BactoClear reinforce each other, improving water quality. Read the instructions for use for starting and maintenance dosage!

BactoClear is not an algacide, it does not immediately clear the pond water, use Algadrex for that! BactoClear helps create good water quality and thus helps prevent green, brown water and reduce filamentous algae growth.

Contents 1 litre, sufficient for 6x treating 20,000 litres of pond water.

Contents 2,5 litre, sufficient for 6x treating 50,000 litres of pond water.

Contents 5 litre, sufficient for 6x treating 100,000 litres of pond water.

COLOMBO BACTOCLEAR 1000 ML/20.000L UK+D.

S.R.P.

€89,99

Art. no.: D5020570

Combating

Algadrex

Algadrex quickly clears turbid opaque ponds, the contaminants clump together and float on the water surface, sink to the bottom or enter the filter.

Fast-acting, water is clear within hours.

Safe for fish and plants, always test water parameters first and correct where necessary before adding algacides!

COLOMBO ALGADREX 500ML/5.000L UK+D.

S.R.P.

€15,99

Art. no.: D5020519

Contents: 500 ml sufficient for treating 5,000 litres of pond water.

COLOMBO ALGADREX 1.000ML/10.000L UK+D.

S.R.P.

€26,99

Art. no.: D5020520

S.R.P.

€49,99

Art. no.: D5020523

Contents: 2,500 ml sufficient for treating 25,000 litres of pond water

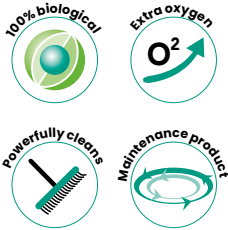

Prevent & control algae.

Thread Blanket Weed.

Prevent

BiOx

BiOx cleans your pond with active oxygen and breaks down silt. As soon as BiOx comes into contact with the water, active oxygen is immediately released. BiOx's strong natural oxidising power breaks down organic pollutants and sludge. Oxygen is an important factor in the environment of your pond. The bacteria in the pond filter use oxygen in breaking down waste products, and improved oxygen saturation therefore improves the performance of your biological filter.

Using BiOx weekly will keep your pond clean and free of algae.

Contents 1 litre, sufficient for treating 32,000 litres of pond water once.

Contents 2.5 litres, sufficient for treating 80,000 litres of pond water once.

Contents 5 litres, sufficient for treating 80,000 litres of pond water once.

Give the pond a cleaning twice a year with a double dose! Read instructions for cleaning and maintenance dosage!

Phosphate X

Phosphate, with nitrate, is the main food source for algae. Reducing phosphate prevents algae from becoming a problem.

Phosphate X binds phosphates directly!

Test phosphate levels with the Colombo Aquadest Phosphate test and dose Phosphate X as needed.

Capacity 1,000 ml, removes 10,000 mg phosphate.

COLOMBO PHOSPHATE X
1000ML/10.000L.

S.R.P.

€19,99

Art. no.: 05020243

Combating

Alginin®

Alginin is a powerful and effective solution against blanket weed, within a few days the blanket weed will start to disappear and after 14 days the entire pond will be free of blanket weed.

The enzymatic action of Alginin keeps filamentous algae deprived of sufficient nutrition.

Contents: 1,000 ml sufficient for treating 10,000 litres of pond water, including test strip for a water test before treatment.

Contents: 2,500 ml sufficient for treating 25,000 litres of pond water, including test strip for a water test before treatment.

Contents: 5,000 ml sufficient for treating 50,000 litres of pond water, including test strip for a water test before treatment.

Safe for fish and plants, always test water parameters first and correct where necessary before adding algaecides!

Fish Disease – Morenicol Medication

Based on 40 years of experience and research, Colombo offers the most effective remedies for treating fish diseases.

Fish can get sick due to a variety of circumstances. The main causes are poor water quality, poor nutrition, and moving fish. This causes stress that makes the fish fall ill. It is important to recognise the symptoms of fish diseases early so that treatment is started in time!

FMC-50

FMC-50 is effective against fungus and white spot.

Fungus

White spot

Mould is visible to the naked eye as white to green cottony tufts. White spot can be recognised by small white dots on the skin that are best compared to salt crystals.

Contents: 250 ml sufficient to treat 6,250 litres of pond water.

Contents: 1,000 ml sufficient for treating 25,000 litres of pond water.

FMC50 - ANTI WHITE SPOT 250 ML/6.250L.

S.R.P.

€22,99

Lernex®

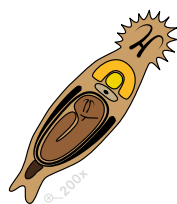

Lernex is effective against invisible parasites ones such as skin worms, gill worms and internal worms, Lernex also provides an effective treatment against visible parasites such as leeches, fish lice and anchor worms.

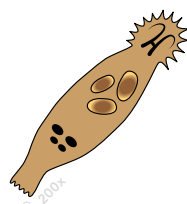

Anchor worms

Fish lice and lerneas

Skin worms

Gill worms

Application; skin worms, gill worms, and internal worms can only be determined under the microscope, ask your pond specialist for advice. Leeches, fish lice and anchor worms are visible to the naked eye.

Lernex is a professional veterinary medicine based on pharmaceutical anthelmintics and thus highly effective.

Contents: 200 grams sufficient for treating 5,000 litres of pond water.

Contents: 800 grams sufficient for treating 20,000 litres of pond water.

LERNEX - ANTI FLUKES/ WORMS 200 GRAM/5.000L.

Lernex Pro®

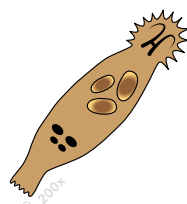

Lernex-Pro is an optimised version of Morenicol Lernex, developed for the treatment of resistant skin and gill flukes in ornamental fish. Lernex-Pro is based on the latest scientific knowledge and contains quality anthelmintics against which resistance has not yet been built up.

Lernex-Pro is highly effective in the treatment of resistant skin and gill flukes, and use only if regular Lernex does not have the desired effect.

Application; skin worms, gill worms, and internal worms can only be determined under the microscope, ask your pond specialist for advice.

Skin worms

Gill worms

Contents: 1,000 ml sufficient for treating 20,000 litres of pond water.

Contents: 2,500 ml sufficient for treating 50,000 litres of pond water.

Lernex Food®

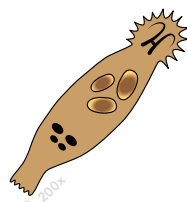

Treating skin and gill flukes in large ponds is often difficult and expensive for which Colombo Lernex Pro Food offers the solution, this innovative feed is designed to fight skin and gill flukes from the inside out.

Lernex Food contains the best anthelmintics, making it the best medicine in treating skin and gill flukes

Medications have a negative impact on water quality, by using Lernex Food you treat in the fish and not the water, and protect water quality.

Skin worms

Gill worms

Contents: 2,500 ml / 800 g food. Feed your fish twice daily for 2 weeks, read the instructions for use for full treatment advice.

Support for fish diseases.

Sales of medication is subject to local legislation. Ask the authorities if sales is allowed.

Vita-Spray

Vita-Spray contains a broad spectrum of vitamins and trace elements for healthy fish.

Add Vita-Spray to fish food when fish need to strengthen, for example after winter or after drug treatment.

Vita spray contains a vegetable flavouring that encourages fish to eat, so they get enough vitamins.

Sales of medication is subject to local legislation. Ask the authorities if sales is allowed.

Propolis

Colombo Propolis Wound Spray contains a concentrated propolis extract. Because propolis adheres very strongly to tissue but is not water-soluble, it remains on wounds for a long time and thus protects wounds from infection by bacteria and fungi.

Propolis is a 100% natural product made by bees.

Propolis is rich in many medicinal herbs and plant substances collected by bees in nature. This gives propolis strong antibacterial and antifungal properties.

Packed in handy vial with finger sprayer, Contents: 50 ml.

MORENICOL PROPOLIS WOUND SPRAY 50 ML.

Wound Clean

With Colombo Wound Cleaner, wounds and damages on fish are completely cleaned. This is a prerequisite for proper healing of wounds and damages.

Colombo Wound Cleanser consists of a dilute hydrogen peroxide solution. Hydrogen peroxide is a powerful cleanser that kills all bacteria and viruses, as well as destroys infected and dead tissue.

After cleaning the wound, use Colombo wound spray to seal and care for the wound.

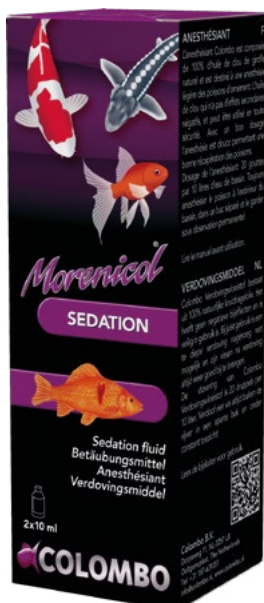

Packed in handy vial. Contents: 50 ml.

MORENICOL WOUND CLEAN 50 ML.

Sedation

Use Colombo Anaesthetic Liquid to anaesthetise your fish, for example when you have to treat wounds or skin ulcers on your fish.

Colombo anaesthetic liquid consists of 100% natural clove oil. It has no negative side effects and is safe to use.

When used correctly, too deep anaesthesia is virtually impossible and fish are always easy to recover after anaesthesia.

Contents: 2 x 10 ml. Sufficient for 200 litres of water, you never anaesthetise fish in the pond, always in a separate bowl or tank.

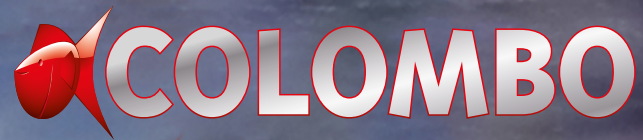

MORENICOL SEDATION LIQUID 20 ML.
